

Fred Hutch Busulfan Pharmacokinetics Laboratory Policy

Busulfan Sample Rejection Criteria for Referral Clients

To ensure quality of the results and better serve the patients from referral clients, the following criteria must be met or the samples can be rejected:

1. The samples must arrive in the lab frozen.
2. The samples must arrive in the lab in the form of plasma, not whole blood.
3. The labels on the plasma tubes must consist of at least two patient identifiers (i.e. patient name, medical record number, and/or date of birth).
4. The samples must be shipped with a requisition which consists of the information of patient's demographics, dosing and regimen, sample collection clock times, and possible drug interactions.
5. The requisition must be signed by a physician or a designee as patient's care giver.

Please direct all questions regarding the above criteria to PK Lab at 206.606.7389 or email the lab at pklab@fredhutch.org.
